Stowe's Green Mountain Inn is adding an elevator to better accommodate guests

Stowe, VT - As part of their ongoing capital improvement work, The Green Mountain Inn will shortly begin the installation of an elevator. This elevator will service the main dining room, function room, living rooms and 41 guest rooms located in the Main Inn building and Depot building. In addition to improving the handicapped accessibility of the dining and function rooms, the new elevator will greatly improve the guest experience for visitors staying in the Main Inn and Depot buildings.

"We're continually working to give our guests the best experience possible and we feel that installing an elevator will not only enhance the property but also make the Inn more accessible to our guests," said Ken Biedermann, the Inn's General Manager.

Out of respect for the historic structure of the Main Inn, which was built in 1833, and the village of Stowe's wonderful Main street, the elevator will be installed on the back of the building. Construction will take place during the weekdays and will only affect a small number of rooms in the Main building. Units in the Mansfield House, the Mill House, Sanborn House and Club House will not be affected during construction.

The project will begin in early April and is expected to be completed by the end of June 2008.

About the Green Mountain Inn

This year the Green Mountain Inn is celebrating its 175th anniversary. The Inn began as a coaching inn for 19th-century travelers located in the heart of Stowe village. Stowe's original inn retains much of its antique charm offering 104 rooms, suites and townhouses. Guests enjoy two acclaimed restaurants, the Whip Bar & Grill and the Main Street Dining Room, specialty shops, a year-round heated outdoor pool, afternoon tea and cookies, health club facility, massage services and much more. For more information visit www.greenmountaininn.com.
